

Problem Statements: The Innovation Challenges

10. Nav Ujjwal Bharat Innovation

“The only way to discover the limits of the possible is to go beyond them into the impossible” – Arthur C. Clarke

To innovate, all one needs is to observe.

Look around; you'll see millions of problems the country faces. The first step to solve is to find the underlying issues.

This domain is all about thinking outside the box and solving the issues the country faces that have been overlooked by the organizers of the Hackathon.

The participants can highlight any specific problem observed in our country and give their developed technological/applied science solutions.
